	3 x bottles	2 bottles	2 bottles	2 packets
	Test 450mg	Deca 100mg	Equipoise	Winstrol Extra Strength

Notes

This stack does not include estrogen blockers.

3IU (or 2,5IU twice a day) of Growth Hormone should be included

The idea here is to allow the aromatizing of testosterone into estrogen to happen more freely for more gains but not a crisp look

You need estrogen to build muscle so we are allowing it to convert much more than usual

Equipoise is being included to increase the appetite and it is strongly recommended to speak to pay John Leslie for a bulking diet

For added size insulin could be included but its also strongly advised to pay John Leslie for a insulin regime to match the diet

Constant monitoring should be done with this stack and if there is to much water retention estrogen blockers should be included

John Leslie O82 638 5109

Aftert this cycle we can move to a dieting or leaning down cycle
